

SAVE THE CLIMATE FOR OUR GRANDCHILDREN

According to the UN's climate report (IPCC, March 2023), a summary of tens of thousands of studies, the rapid climate change will be devastating for future generations. Sweden is a rich country and responsible for high historical emissions per capita.

We, the grandparents, demand from politicians:

- **Listen to climate science**
- **Comply with the Climate Act**
as agreed upon by 7 out of 8 political parties in 2017
- **Dare to take the decisions necessary
for our grandchildren's future**
- **Act now!**

GRAND PANTHERS make these demands at the Swedish Parliament on the last Wednesday of every month. *grandpanthers.se*
