

SAVE THE CLIMATE FOR OUR GRANDCHILDREN

We are in a serious climate crisis!

The climate has never been warmer in human history. Sweden is a rich country, responsible for high historical emissions per capita.

In 2017, all political parties except SD agreed on the Climate Act to reduce emissions.

Now, the government violates the Climate Act and increases emissions. Scientists say emissions must be reduced by 7 % yearly until 2030, if we are to meet the 1.5°C Climate Goal.

We, the grandparents,
demand from the government:

Reduce emissions now!

Do not violate the Climate Act.
